

# SHORT VISIT [4] TIC

- JOHN SIMON

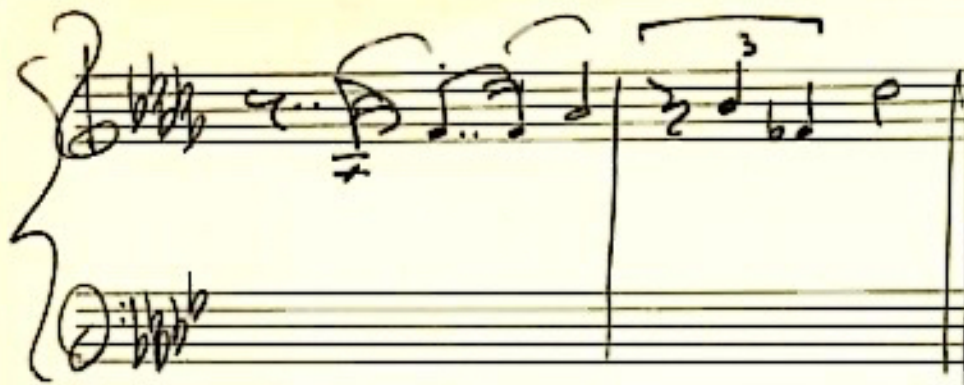

$A\flat^7$   $G\flat^7$   
 $sw^1 - m^2 - sw^4 - m^2 -$

It was a short-visit  
 but there was much-plunder  
 we got a lot since

accomp. simile al fine

we arrived.  
 It was a short-visit  
 & it's no wonder we've

out-grow the wall & there's  
 no larger size

2. It was a short visit. from the cave to the city.  
How high to rise; how low can we fall?

~~It was a short visit, but there's no room for pity.  
We're lucky to have been here at all.~~

3. Now I hear it said by some among us,  
who really believe that man can pull us through,

~~"Men can do it. Help us to it."~~

~~I hope they're right & I hope that it's true.~~

Cuz, meanwhile, upwind from here there's a nuclear reactor

& some say it's dangerous as can be

~~And the man that built it is some great actor -~~

~~Hiding the truth from his family.~~

4. So tell us the truth. Tell us all the facts.

Make it plain, crystal-clear.

Cuz a man who knows is a man who acts

& plenty o' people are just waitin' to hear.

It was a short visit.

fine
